Aims of teaching

The course is aimed at identifying, measuring, analyzing, interpreting, and communicating information for the pursuit of an organization's goals. The course provides future managers the tools needed to make the best decisions to achieve the goals of their organizations. Students will take a look at how relevant traditional and leading-edge topics integrate together with an outcome of understanding basic cost analysis, decision definitions, relevant information formatting, and how to make the decision itself. This will encourage managers to not only use all quantitative tools and techniques available to them, but also logic, insight, judgment, and common sense.
